

David Bracho

La Mora, Conj 406. Edo. Lara
Barquismeto, Venezuela

Summary

- o Dynamic and adaptable **IT** professional with over 15 years of experience in system administration, DevOps, and hardware management.
- o Proven expertise in Linux environments, automation, and network configuration, with a strong command of modern DevOps tools including Grafana, Prometheus, Ansible, Docker, Kubernetes, and Terraform.
- o Committed to delivering efficient, scalable, and high-quality solutions as a collaborative team player.

Skills

- o **Operating Systems:** Windows/Linux (Gentoo, Arch, Debian, Ubuntu)
- o **Programming & Scripting:** Python, Bash
- o **Automation Tools:** Ansible, Terraform, Jenkins, GitLab CI
- o **Containerization & Orchestration:** Docker, Kubernetes
- o **Monitoring & Visualization:** Prometheus, Grafana
- o **Networking:** VPN configuration, multi-WAN failover, WAN/LAN management
- o **DevOps Practices:** CI/CD pipelines, infrastructure-as-code, hybrid cloud integration
- o **Hardware:** PC and laptop assembly/disassembly, hardware repairs, printer maintenance
- o **Embedded Systems:** EEPROM and microcontroller programming
- o **Soft Skills:** Teamwork, adaptability, efficiency, quick learner

Experience

April 2009 –
March 2024

Freelance IT Consultant (Tramaca), *Multiple Companies*, Maracaibo-Barquisimeto-Valencia, Venezuela, 15 years

Provided IT services as a self-employed consultant under the Tramaca banner, delivering system administration, DevOps, and hardware solutions to various companies across Venezuela.

Managed Linux-based servers for WAN/LAN networks supporting 20+ daily users, implementing multi-WAN failover and secure VPN configurations.

Automated infrastructure provisioning and management using Terraform and Ansible, reducing deployment times by 40%.

Deployed and managed containerized workloads with Docker and Kubernetes, ensuring scalability and resilience across hybrid environments.

Implemented Prometheus for real-time system monitoring and Grafana for advanced dashboard visualization, improving incident response times by 25%.

Developed Python-based tools for log aggregation, backup automation, and system health checks, enhancing operational efficiency.

Engaged in embedded systems development, programming EEPROMs and microcontrollers for custom hardware solutions.

Oversaw full lifecycle hardware management, including assembly, upgrades, and repairs of laptops and PCs.

Courses & Certifications

- o **Troubleshooting and Debugging Techniques**, Coursera, Certificate
- o **AWS Cloud Technical Essentials**, Coursera, Certificate
- o **DevOps on AWS: Code, Build, and Test**, Coursera, Certificate
- o **DevOps on AWS Specialization**, Coursera, Certificate
- o **Using Python to Interact with the Operating System**, Coursera, Certificate
- o **Introduction to Back-End Development**, Coursera, Certificate

Education

- o **High school**, San Tarsicio, 1993 – 1999
